

Rider

Sono la purezza e la leggerezza delle linee geometriche a connotare Rider. Questa sedia, attualmente disponibile con due altezze differenti di schienale, è caratterizzata da una struttura in tubolare metallico a sezione quadrata: ad oggi si arricchisce delle finiture verniciato ottone bronzato e acciaio platinato. Si aggiungono alla collezione esistente le due versioni con bracciolo: la prima, dalle linee rigorose, è realizzata tutta in metallo, mentre la seconda offre l'aggiunta sul bracciolo di un tubolare a sezione cilindrica in massello di rovere, laccato lucido o laccato opaco nei diversi colori disponibili a catalogo.

It is the purity and lightness of the geometric lines that connote 'Rider'. This chair, currently available with two different back heights, is characterized by a metal structure with a square-shaped section; it is now enriched with two new finishes: varnished bronzed brass and platinum steel. Two new versions with armrests add up to the existing range: the first, with rigorous lines, is fully realized in metal while the second offers the addition on the armrest of a tubular shaped oak with cylindrical section, matt or glossy lacquered in the available colour palette.
